EDUCATION

THE UNIVERSITY OF WASHINGTON

B.A. in Geospatial Data Science with a Minor in Informatics (GPA – 3.8/4.0)

Seattle, WA
June 2025

- Dean's List (8x Quarters)
- Humanities Data Science Institute Fellowship Recipient (2024)
- Algorithms & Data Structures, Machine Learning, Database Systems, Full Stack Development

EXPERIENCE

MOODROOM

Lead Engineer (Contract)

Seattle, WA
Oct 2025 – Feb 2026

- Led development of a 3D mobile game application as the sole engineer on a cross-functional team of 5.
- Revived a 3-month stalled MVP by identifying and triaging 50+ bugs over 9 systems.
- Translated 25+ Figma designs into fully functional in-engine UI and gameplay features.
- Designed modular game architecture in the Godot engine, by restructuring all 9 gameplay and platform systems.
- Engineered infrastructure supporting 50+ 3D assets and 10+ media file types.
- Shipped a fully functional beta to ~100 early testers via Apple TestFlight within 1 month by performing a full QA.

UNIVERSITY OF WASHINGTON eSCIENCE INSTITUTE

Data Science Research Intern

Seattle, WA
Jun 2024 – Aug 2024

- Selected as 1 of 16 Undergraduate Research Fellows on a faculty-led research team with PhD researchers.
- Built automated Python text-parsing pipelines using regular expressions to process a 160K-record bibliographic dataset, improving data coverage by 15% and achieving 98% extraction accuracy.
- Increased analysis and lookup speed by 20% by designing a normalized SQL schema for storing and querying processed records.
- Presented research findings at the University of Washington Undergraduate Research Symposium attended by 1,500+ participants.

THE DAILY UW

Contributing Writer

Seattle, WA
Oct 2022 – Aug 2024

- Published 7 articles in my university's most prestigious newspaper covering public health, scientific research, and campus issues.
- Interviewed faculty researchers and distilled complex scientific findings into clear narratives for non-technical audiences.

PROJECTS

UW ALERT MAPPING SYSTEM

Feb 2025 – Present

- Developed a full-stack JavaScript web GIS platform that processes live 911 call data from open-source APIs every 5 minutes, aggregating 1M+ records to identify high-risk zones and safe travel paths across campus.
- Engineered backend data pipelines and geospatial analysis tools supporting an iOS extension.

SNOHOMISH COUNTY DISASTER RELIEF PLATFORM

Mar 2025 – Jun 2025

- Created a dynamic FEMA compliant disaster reporting platform made available to over 800k residents.
- This platform reduced disaster relief data collection time by 50% for 20+ emergency staff, while accompanying Tableau dashboards enabled real-time prioritization of uninsured households.

MAP BASED EDUCATIONAL APP – TERRA ANTIQUA

Jun 2025 – Aug 2025

- Built a React-based educational platform for exploring ancient civilization history through an interactive map interface.
- Manually reconstructed 30+ fragmented JSON datasets from scratch into a coordinate system compatible with the Google Maps API.

TECHNICAL SKILLS

Languages

Frameworks & Libraries

Tools & Technologies

Certifications

Python, JavaScript, SQL, R, Java

React, Node.js, pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

PostgreSQL, Tableau, ArcGIS, Godot, Git, Excel

AWS Certified Cloud Practitioner – Amazon Web Services *Issued June 2026*
